About me

I am a junior full-stack web developer, also worked on developing desktop applications for the Pardus operating system. My knowledge and skills encompass various technologies, including HTML, CSS, Javascript, React, Material UI, Java, Spring boot and Laravel. I am passionate and talented in web development and, constantly striving to improve myself and keep up with the latest innovations. I also pay attention to designing robust and efficient backend systems. I possess strong collaboration abilities and work well in a team environment. I have a strong ability to analyze and solve problems. I am eager to apply my creative thinking skills to projects and open to new ideas. As an IT professional, I voluntarily completed a 1.5-year internship focusing on computer maintenance, repairs, and basic networking.
